## Introduction

### SweetPad is a fundraising and trading platform on Binance Smart Chain

**SweetPad** is a launchpad for investing in diverse newborn crypto projects in spheres such as GameFi, DeFi, Metaverse, and others. All projects are fully **double audited** before launching on SweetPad guaranteeing a safe investment environment for our users.

SweetPad has integrated the NFT staking system with a pioneering mechanism that gives the users newly launched projects coins for free.

## Why SweetPad?

### Ease of usage

We engineered our platform in a very user-friendly way to give access to all types of audiences including beginners in Crypto with no previous knowledge. We have made our platform and this guide clear and understandable. When referring to each topic, as necessary, we have placed charts explaining the material and situational screenshots. We regularly publish thematic articles on Medium, which explain in detail the hard-to-understand materials. SweetPad Customer Support Center is in constant touch with all the people who need our help.

### Guaranteed Whitelist spots

Unlike other launchpad platforms, we have allocated whitelist spots where the spot is guaranteed for the user.

### Multifunctional NFT collection

SweetPad has its NFT system, where NFTs not only are of several types but also have many features, some of which will be applicable in the short term and others in the long-term vision.

### The Anti Rug Pull mechanism

SweetPad carefully dissects every project applied for the launchpad IDO, to

ensure the safety of our users' investments, to fulfill that, the applied projects will pass a Double Audit, which includes 2 phases of authentication.

## *Internal Authentication*

SweetPad has a Coin Audit department, which has a team full of crypto experts who are responsible for screening the projects applied and their tokenomics.

## *External Authentication*

To ensure maximum safety for the investors, SweetPad has external independent Coin Auditors whose names will remain anonymous thus minimizing corruption risks.

## *Locked Tokens*

The team wallet will be locked for the first 6 months with a vesting plan of 18 months giving reassurance for our users, also reserve wallet is locked and controlled by a smart contract which will automatically unlock a portion of tokens when the liquidation pool is low.

## **Anti-Sniping Bots system**

One of the biggest problems in launchpads is the sniping bots. Sniping bots buy the token once launched and sell it after a few hours, causing a price crash endangering users' investments and project continuity. However, in SweetPad sniping bots have no power, since all allocations will be only through the Whitelist.

## **The first launchpad in Metaverse**

This will be the first metaverse launchpad means that you can buy your coins through the metaverse world, and interact with projects & people inside.

## **Trust & Transparency**

- SweetPad will be audited by Certik and will be listed on Coingecko.
- Our codes will be public and posted on the GitHub repository.

- Locked liquidity wallet with the team wallets will be unlocked after the 18 months vesting program.

## Tokenomics

### Token information

**Type:** Binance Smart Chain

**Ticker:** SWT

**Total supply:** 100,000,000 SWT (Fixed)

**Token contract:** 0xE8EbCf4Fd1faa9B77c0ec0B26e7Cc32a251Cd799

**Initial circulating supply:** 44,000,000 SWT

**Initial market cap:** 22,000,000\$

**Private sales price:** 0.25\$

**Public sales price:** 0.50\$

### Token distribution & Vesting

Here we have some charts showing the SWT distribution and vesting plan totally and for the team separately.

Seed Stage	4%	Unlocked to provide tiers for the investors and their investments are locked for a 6 month minimum period.
Private Sales	15%	Unlocked to provide tiers for the investors and their investments are locked for a 6 month minimum period.
Public Sales	5%	Unlocked
Advisers	4%	Locked for 6 months, then 10% unlocked every month after.
Liquidity	18%	Unlocked
Team	19%	Locked for 6 months, then 10% unlocked every month after.
Marketing	9%	60% unlocked, 10% unlocked each month
Reserve	25%	Locked and controlled by smart contract, when liquidity decreases, it will automatically unlock a part of tokens and add it to the liquidation pool.
Charity	1%	To be decided by governance (Users voting)

## Team SWTs' Vesting

SweetPad team undergoes a fierce vesting program distributing the 19% of the team in 18 months with the following schedule:

### 2022 Vesting Schedule

March 22'	April 22'	May 22'	June 22'	July 22'	August 22'	Sep 22'	Oct 22'	Nov 22'	Dec 22'
0%	0%	0%	0%	0%	0%	1,6%	1,6%	1,6%	1,6%

### 2023 Vesting Schedule

Jan 23'	Feb 23'	March 23'	April 23'	May 23'	June 23'	July 23'	August 23'	Sep 23'
1,6%	1,6%	1,6%	1,6%	1,6%	1,6%	1,6%	1,6%	1,6%

## Fees

There are some transaction fees on the Binance Smart chain. However, SweetPad is charging absolutely 0 fees for the sake of our investors.

## xSWT Calculating Process

The calculations are dynamic depending on the days locked, so to make it simpler for our users we have a built-in calculator on our website. Just in the first line, you should write the number of SWTs that you are going to stake, and in the second line — the staking period. As a result, the calculator will show you in the third line what power of allocation is expected for you. There you can also find the names of our 3 NFT Tiers, which you can click to get acquainted with them and their capabilities.

Also, you can calculate it manually with the following formula:

$$182 \text{ days (Minimum)} = 0.5 \times \text{SWT}$$

$$183 - 365 \text{ days} = \left( \frac{1}{365} \times \text{days staked} \times \text{SWT} \right)$$

$$366 - 1095 \text{ days} = \left( \left( \frac{2}{730} \times \left( \frac{\text{days} - 365}{2} \right) + 1 \right) \right) \times \text{SWT}$$

And here we have the simplified expression of that formula:

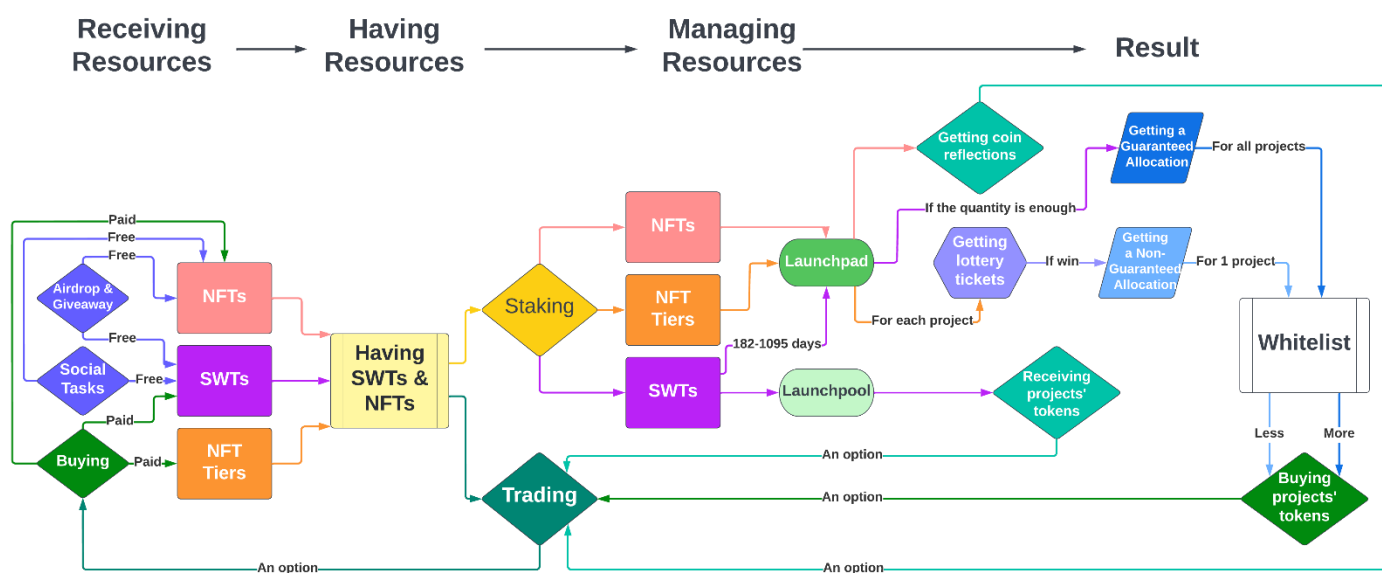

Staked SWT coin	Received XSWT Reward
182 Days ( 0.5 Year ) locked Staking	
1 SWT	0.5 xSWT
365 Days ( 1 Year ) Locked Staking	
1 SWT	1 xSWT
730 Days ( 2 Years ) Locked Staking	
1 SWT	1.5 xSWT
1095 Days ( 3 Years ) Locked Staking	
1 SWT	2 xSWT

## Ecosystem

### Allocations

In general, the allocation here refers to the, let's say, permission to buy tokens to some particular quantity, that is, only users with allocations will be able to buy tokens from projects that are running on our platform because having an allocation means that they are in the Whitelist. So, as you understood, Whitelist is a list of all the users who have the opportunity to invest in certain projects through our platform.

### Guaranteed Allocation

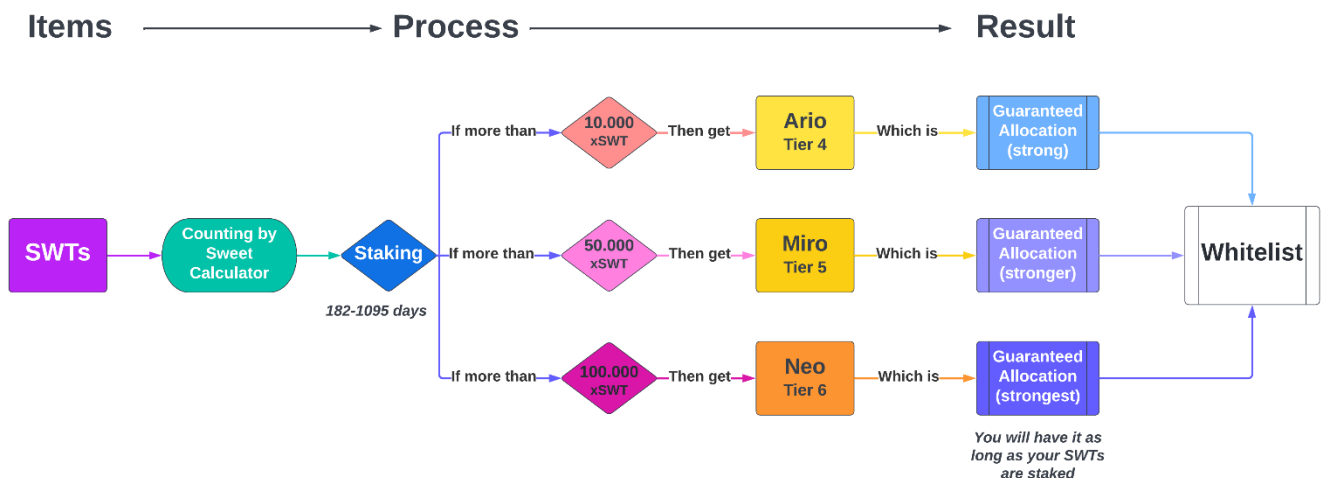

If you stake a proper amount of SWTs for an appropriate period in the launchpad, you will receive a guaranteed allocation, which allows you to buy the tokens of all the projects launched on our platform in a very cheap way during their Private and Public Sale stages, but this only during the allocation period of your staked SWTs. After a while, the tokens of those projects will become more expensive, as a result of which you will have high & profitable returns.

Users who have acquired guaranteed allocation have the right to purchase tokens from ALL PROJECTS launched on our platform during the allocation period, but only to the extent that their allocation will allow. This type is called guaranteed allocation, meaning that giving the user the right to purchase is guaranteed by the platform.

Guaranteed allocation on our platform has 3 Tiers: Ario (Tier 4), Miro (Tier 5) & Neo (Tier 6). These Tiers differ from each other in their value as well as in the opportunities they give. The value of allocations here is measured by their power.

By power, we mean the amount of opportunity the Tier gives the user, in other words, the more powerful the allocation, the more tokens the user can buy from the new project. On our platform, the power of allocations is measured in xSWT, which at the same time can be considered their value. Ario costs 10K xSWT, Miro is 50K xSWT, and Neo is 100K xSWT, but that does not mean that just by paying that much SWT you will be able to get the allocations. This means that the ratio of staked SWTs to their staking period must have a result of at least 10.000 xSWT for Ario, 50.000 xSWT for Miro & 100.000 xSWT for Neo, i.e. Neo is the most expensive Tier, but at the same time, it allows you to buy more tokens from other projects than the rest.

## Non-Guaranteed Allocation

Here users do not always have the right to buy tokens, so this is called non-guaranteed allocation, meaning that their allocation isn't 100%, let's say it's 50/50, either they will win the lottery & get it or not.

## Working System & NFT Tiers

Receiving a non-guaranteed allocation is possible only as a result of winning the lottery that takes place before the start of each project. Users with non-guaranteed allocation have the right to buy tokens in the amount their allocation permits, but **ONLY FROM CERTAIN PROJECTS**, and only in case they are selected by lottery. To participate in the lottery, you need tickets, which can be obtained by staking NFT Tiers or by receiving some gift tickets as a result of the airdrop. In the case of non-guaranteed allocation, the opportunities to buy tokens

Choco

Tier 1

5  
Lottery Tickets

Frodo

Tier 2

12  
Lottery Tickets

Hugo

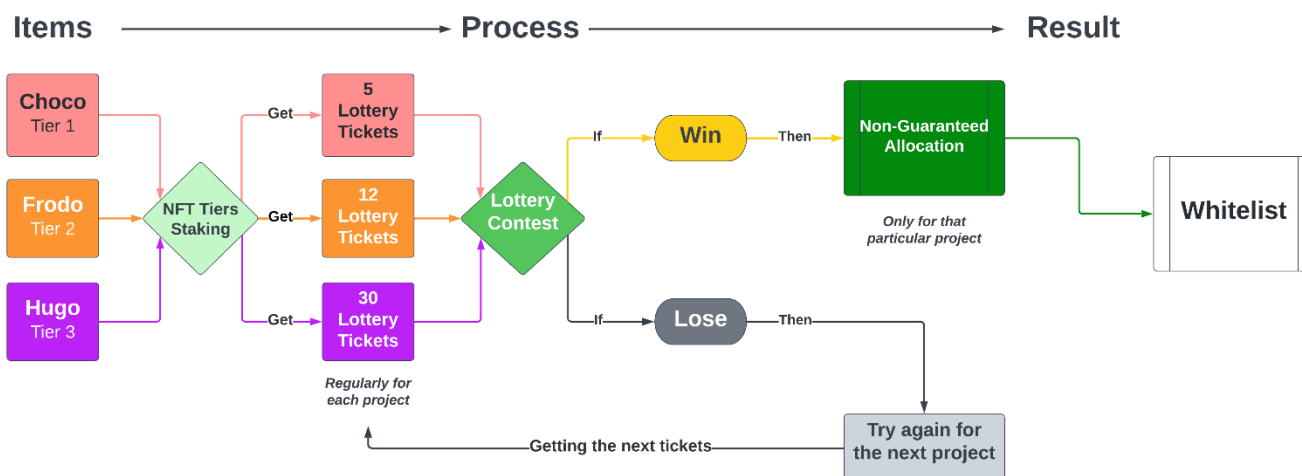

Tier 3

30  
Lottery Tickets

are, of course, more limited than in the case of guaranteed.

We have 3 NFT Tiers: Choco (Tier 1), Frodo (Tier 2) & Hugo (Tier 3), respectively, in the hierarchical order. In case of staking the Tiers, you will receive 5, 12 & 30 lottery tickets accordingly.

There is no minimum or maximum staking period for NFT Tiers, you can stake as long as you want. Lottery tickets will be given to you before each draw, and each new project on our platform assumes a new draw before the start. That is, if, for example, you stake Choco, you will receive 5 tickets periodically before each project and as long as your NFT Tier is staked. If you decide to unstake it, your current tickets will be canceled. Winners of the lottery will be eligible to purchase tokens of the project but will have restrictions depending on their NFT Tiers.

## NFT Tiers staking

Buy an NFT Tier  
with BUSD

Stake the NFT Tier  
to receive  
Lottery Tickets

Win the Lottery  
& receive a non-guaranteed  
allocation for the  
new project

Buy the coins of the IDO  
with the cheapest price

The second way to use NFT Tiers is to sell them in the Marketplace.

## NFT game

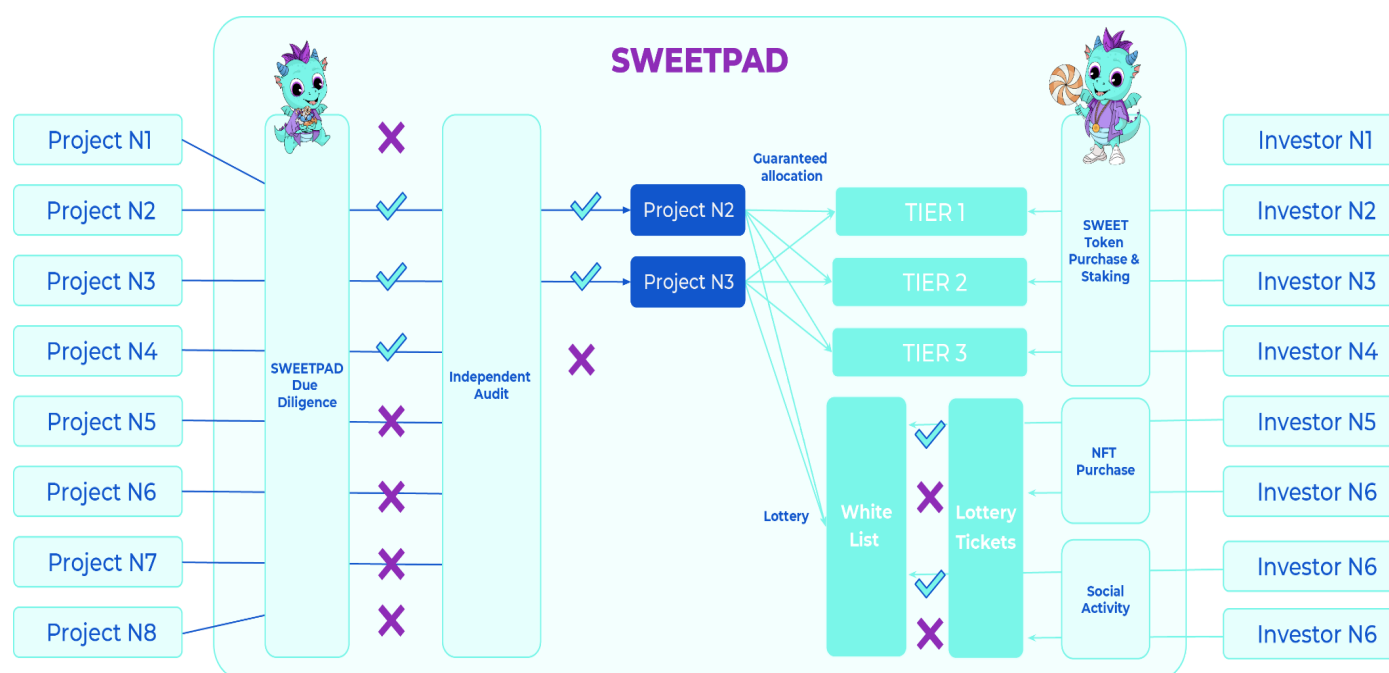

NFT Game is planned to start in the 3rd Quarter. NFT crates will be put up for sale, which will contain 1 NFT with a certain power. The crates will be sold in BUSDs. Buyers will naturally get NFTs, and there are 2 main ways to handle NFTs: sell them on any BSC marketplace or stake them on our platform, receiving

different projects' coins as a reward. The size of the prize will depend on the power of the NFT, which can be between 1 and 10 levels.

## Map of Work

This section presents the principle of work of SweetPad and the Roadmap. This diagram refers to the mechanisms of involving projects & investors here. A more detailed reference will be made when talking about the Double Audit system in the next heading.

## The Double Audit System

*Our internal consultants' team*

Projects pass our due diligence:

- Product
- Smart Contract
- Tokenomics
- Product Economics
- Finance
- Team, KYC
- Prospective, Market Potential

Then for the next step, they pass an “external” filtration.

*An independent audit experts' panel*

- Selected projects get final validation by an independent audit
- Projects go live on the SWEETPAD website
- Projects are launched on SWEETPAD

## Roadmap

Quarter 1	Quarter 2	Quarter 3	Quarter 4
RoadMap <input checked="" type="checkbox"/>	SWT coin Airdrop	Exchanger Launch	Start Sweet Game
Website <input checked="" type="checkbox"/>	Public Sale	Pools Opening	Start Sweet Metaverse
CoinMarketCap ICO listing <input checked="" type="checkbox"/>	Platform Launch	150,000 Community	200,000 Community
NFT Airdrop <input checked="" type="checkbox"/>	Staking Launch	5,000 Holders	10,000 Holders
50,000 Community <input checked="" type="checkbox"/>	Partnerships	NFT Game	
Private Sales	NFT Release		
	NFT Marketplace		
	Listing on Different Exchanges		
	CoinGecko Listing		
	Influencer Marketing Push		
	100,000 Community		

---

Above is the Roadmap of SweetPad 2022. Details about the upcoming events will be published soon. Follow our social platforms to be informed about all the news and updates.
